EDUCATION

City University of Hong Kong — Bachelor of Science in Computer Science Full Tuition Scholarship (HK\$145,000 per annum) — Merit-based Dean's List , Semester B 2023/2024 (GPA ≥ 3.7) Relevant coursework: Java, JavaScript, C++, Python	Sep 2023 – Jun 2027 Hong Kong
Korea Advanced Institute of Science & Technology — Student Exchange Program Ranked #20 globally in Engineering & Technology (QS 2024) Relevant coursework: Database (SQL), Startup Design	Feb – Jun 2025 South Korea

WORK EXPERIENCE

Junior Software Engineer (Full Stack) <i>Universal Innotech Group Company Limited (InsurTech)</i>	Jul 2025 - Present Hong Kong
- Developed 100+ frontend and backend files for a large-scale insurance web platform (800+ files, 100+ APIs) using Next.js, React.js, Tailwind CSS, MongoDB, and Prisma. - Designed and implemented 20+ RESTful API endpoints and user-friendly forms, enhancing key insurance features and user experience. - Onboarded and became productive in a complex codebase within 1 month by rapidly mastering new technologies and used Jira to track tasks and incorporate feedback in daily Agile meetings.	
Mobile Application Developer Intern <i>Healfie Technology Limited</i>	Jun - Jul 2024 Hong Kong
- Redesigned mobile app UI for eye health services, reducing task completion time by 34% and improving accessibility for elderly users. - Improved app reliability by resolving responsiveness issues and implementing error notifications. - Delivered major UI improvements within 4 weeks by independently self-learning React Native and Vue.js during the internship.	

PROJECTS & LEADERSHIP

Code for Good Hackathon – Learning Platform for HK Children in Need <i>J.P. Morgan Chase</i>	Oct 2025 Hong Kong
- Built a learning website prototype within 7 hours, improving navigation and content updates for an education nonprofit. - Conducted stakeholder interviews and converted insights into prioritized user stories and a scoped MVP roadmap. - Designed a Figma prototype and React implementation plan, enabling efficient future development and delivery.	
Pocket Inventory – Smart Food Tracking App (Team Lead, Mobile Developer) <i>Korea Advanced Institute of Science & Technology</i>	2025 South Korea
Led a cross-functional team of 4 to build a mobile app prototype with image recognition for food tracking, expiry alerts, and waste reduction. - Designed intuitive UI/UX and translated user research from 40+ respondents into high-impact features for consumers and businesses. Pitched the product to 10+ business professionals, gaining feedback on startup design and communication.
